Professional Summary

Aspiring Data Analyst and Electrical Engineering graduate with strong hands-on experience in business intelligence, dashboard development, data visualization, and technical research. Proficient in Power BI, Power Query, Excel, MYSQL and MATLAB/Simulink. Proven ability to transform complex datasets into actionable business insights through rigorous research at IIT BHU and practical simulations with Deloitte and Tata. Adept at bridging technical engineering concepts with data-driven decision-making.

Education

- B.Tech in Electrical Engineering** 2022 – 2026
Dr. A.P.J. Abdul Kalam Technical University, Lucknow CGPA:7.45

Professional Experience

- Research Intern** June 2025
Indian Institute of Technology ,BHU *Cell Balancing Technique for BMS*
- Conducted in-depth research on Battery Management Systems (BMS), focusing on passive and active cell balancing techniques and battery degradation analysis.
- Performed analytical studies and simulation-based evaluations to optimize battery efficiency and overall system performance metrics.
- Authored detailed technical documentation and research reports to communicate data-driven findings effectively with cross- functional research teams.
- Electrical CAD Trainee** September 2024
Scortek India Pvt. Ltd *AUTOCAD*
- Developed single-line diagrams (SLDs), electrical panel layouts, and AutoCAD-based engineering designs.
- Prepared comprehensive engineering documentation and technical drawings to support project execution and compliance.

Certifications

- Data Visualisation: Empowering Business with Effective Insights Job Simulation – Tata (Forage)
- Get Started Building with Power BI – Microsoft Learn
- Data Analytics Job Simulation – Deloitte (Forage) .
- Cyber Job Simulation – Deloitte (Forage)
- Cyber-Physical Systems Security Workshop – IIIT Allahabad
- Tata - GenAI Powered Data Analytics Job Simulation

Projects

- Grid-Connected Inverter Analysis** : Modeled and simulated a grid-connected inverter system to evaluate power quality, voltage regulation, and total harmonic distortion (THD). Analyzed system performance and stability under varying operating conditions to identify efficiency optimization techniques. .
- Healthcare Analytics Dashboard** : Designed and published an interactive healthcare analytics dashboard in Power BI to monitor hospital operational performance, patient demographics, and billing trends. Cleaned, transformed, and structured raw healthcare datasets using Power Query to ensure high data integrity. Built interactive KPI cards, dynamic visual charts, custom slicers, and drill-through reports to facilitate executive datadriven decision-making. .
- E-Commerce Sales Analysis Using MySQL** : Designed and managed an e-commerce database using MySQL with customer, product, and order tables. Performed SQL queries using JOINS, GROUP BY, aggregate functions, and sales analysis to generate business insights and identify top-performing products and customers. .

Technical Skills

- **Data & BI:** Power BI, Power Query, Data Visualization, Dashboard Development, Data Cleaning, Data Modeling, DAX, Excel, MySQL, SQL Queries
- **Engineering Tools :** MATLAB, Simulink, AutoCAD, Electrical CAD
- **Domain Knowledge :** Battery Management Systems (BMS), Power Systems, Healthcare Analytics, Technical Documentation
- **Core Competencies :** Analytical Thinking, Data Storytelling, Problem Solving, Critical Thinking, Project Management, Cross-Functional Collaboration

Achievements and Activities

- Secured 2nd Place in the Technical Model Presentation at Abhyuday '25 .
- Actively participated in Future 5.0, a technology and innovation event organized by Young Indians (Yi) Bharat Rising. .
